About me

I am in charge of ensuring the quality and reliability of products, I adapt easily to any environment, I like to work in a team. Focus on identifying and solving problems, as well as creating and executing comprehensive test cases. My distinguishing feature is my meticulous and detailed approach, which allows me to detect even the most subtle errors and ensure the delivery of high quality products. With an analytical mindset and strong technical skills, I am committed to delivering a flawless user experience and collaborating closely with development teams to continuously improve software quality.
